TEACHING

Cloud Computing, UCLouvain

Teaching Assistant

As a teaching assistant, I improved the project given to students by enabling new technologies to enhance their knowledge of the DevOps stack further.
2021-2025

Multicore Programming, UCLouvain

Teaching Assistant

As a teaching assistant, I integrated new technologies, such as Jupyter Notebooks and Papermill, into practicals and projects. Those technologies are directly linked to the class topic in terms of reproducibility and large-scale experiments.
2021-2025

Donatien Schmitz

PhD - Computer Science & Engineering

EDUCATION

Ph. D. - Computer Science & Engineering - Resource Management in Distributed Stream Processing: From Fine-Grain Elasticity to Proactive Planning
UCLouvain - Belgium

2021 - 2026

Supervisor: Pr. Etienne Rivière (UCLouvain)

Master - Computer Science
UCLouvain - Belgium

2019 - 2021

Spec. in Computer security and Networks

Bachelor - Computer Science
UCLouvain - Belgium

2014 - 2019

Minor in entrepreneurship.

PUBLICATIONS

Alloy: Transparent Proxy-Based Coupling Between Stream Processing and Storage (G. Rosinosky, D. Schmitz, E. Rivière)
In Proceedings of the 20th ACM International Conference on Distributed and Event-based Systems

DEBS'26

Charon: Fine-Grain Resource Allocation and Optimized Task Placement for Multi-Query Distributed Stream Processing (D. Schmitz, G. Rosinosky, E. Rivière)
The 41st ACM/SIGAPP Symposium on Applied Computing

SAC'26

Justin: Hybrid CPU/Memory elastic scaling for distributed stream processing (D. Schmitz, G. Rosinosky, E. Rivière)
In IFIP International Conference on Distributed Applications and Interoperable Systems

DAIS'25

A Tale of Many Streams: Characterizing a Production Workload in Digazu, a Data Lake supported by Apache Kafka and Flink (D. Schmitz, L. Berrewaerts, G. Rosinosky, S. Skhiri, E. Rivière)
In Proceedings of the 19th ACM International Conference on Distributed and Event-based Systems

DEBS'25

StreamBed: capacity planning for stream processing (G. Rosinosky, D. Schmitz, E. Rivière)
In Proceedings of the 18th ACM International Conference on Distributed and Event-based Systems

DEBS'24

Controlling Security Rules Using Natural Dialogue: an Application to Smart Home Care (S. Goffinet, D. Schmitz, I. Zavalysyn, A. Legay, E. Rivière)
In Proceedings of the 2021 ACM International Joint Conference on Pervasive and Ubiquitous Computing

UbiComp-ISWC'21

WORKSHOPS & CONFERENCES

Proceedings of the 19th ACM International Conference on Distributed and Event-based Systems
Lille, France

June 2025

Proceedings of the 19th ACM International Conference on Distributed and Event-based Systems
Göteborg, Sweden

June 2025

Proceedings of the 18th ACM International Conference on Distributed and Event-based Systems
Lyon, France

June 2024

Middleware '23: Proceedings of the 24th International Middleware Conference
Bologna, Italia

December 2023

GDR RSD Research Winter School 2022
Grenoble, France

March 2022

GDR RSD Research Autumn School 2021
Strasbourg, France

September 2021

PROFESSIONAL EXPERIENCE

Post-Doctoral Researcher March 2026 - Present
Software Developer: Team of Sébastien Jodogne, Computer Science Applied to Medicine. Working as a software developer within the research team of Sébastien Jodogne, with a focus on the application of computer science to the medical field. Contributing to the development of software solutions at the intersection of technology and healthcare.

UCLouvain

CTO 2017-2021

Read&Rate was a publishing house enabling an online community to select the next published best-seller via a web application. As one of the three founders, I was in charge of the technological and management aspects of this company.
